CAMP INTERNET'S THREE CORNERSTONES

Teacher Training

Student Learning

Family Involvement

HAPPY CAMPERS

"Camp Internet offers a new and exciting way for students to learn the core curriculum while integrating technology into their daily learning activities."

Brian Bartlett, Elementary School Teacher

"Students approach the weekly chats and lessons, the informative links, and the Campwide Family Nights with enthusiasm. Once they understand the process, they are self-directed, giving the teacher the opportunity to monitor progress and encourage results."

Carmela Gomes, Middle School Teacher

"All Joseph talked about when he got home were the projects he did with Camp Internet, reports a parent of one of my 4th graders. Camp Internet helps me make a difference with my students. The activities provide the best way to use technology — from the online chats with experts to access to safe web sites."

Janet Gallatin, Elementary School Teacher

"We selected our 'toughest' period to test the Camp Internet curriculum on these are kids that have been designated by our site as 'at risk'. The Camp curriculum has engaged them and the behavioral problems this group has a reputation for are almost non-existent. It is like the difference between night and day with this group comparing their behavior before and after we started with the Camp Internet curriculum."

Ken Decroo, Middle School Teacher

"The children absolutely love Camp Internet's digs and chats and have improved their reading comprehension as a result of using them."

Helge Ziazic, Elementary School Teacher

"Through my various interactions with Camp Internet, I have been astounded at its ability to use technology to enrich the lives of students and families. I encourage you to visit their web site to better understand the benefits to students."

Senator Jack O'Connell

"The Camp Internet project brings classrooms together with subject specialists at museums, universities, national and state parks, National Marine Sanctuaries and other education agencies to enhance the student learning experience — an experience only feasible with computer-facilitated learning."

US Department of Education
Promising Initiatives to Improve Education!

JOIN A LEARNING EXPEDITION AND TEACHER TRAINING

Reading • History • Science • Social Studies • Math • Art • Technology

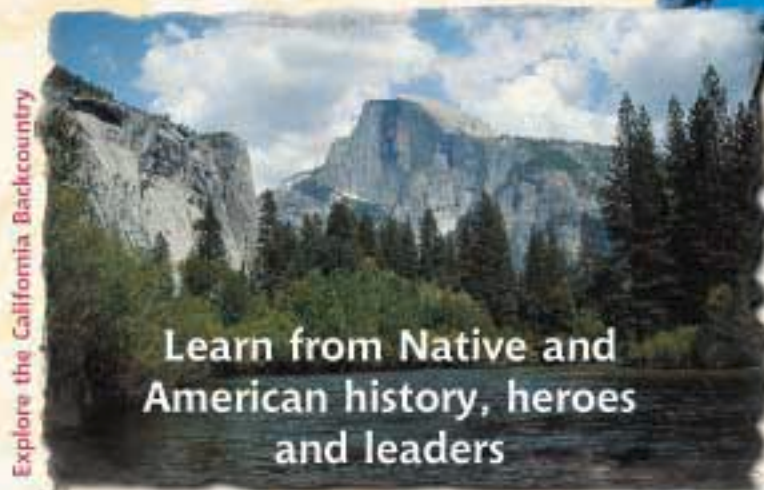

Camp Internet's online learning expeditions empower teachers to deliver award-winning multi-cultural content in the classroom that immediately engages student learning. Every expedition offers teachers the ability to customize reading, writing, history, science, social studies, art and technology standards-based themes that enhance the core curriculum. And every Expedition challenges students to read, write, research, analyze and communicate at a higher level.

Connect Sciences and History

Reading & Math with Technology

Explore the California Channel Islands

Learn from Native and American history, heroes and leaders

Explore the California Backcountry

Enroll your Classrooms and Teachers in a nationally recognized program that has received Smithsonian Innovation Network, US Dep't of Education, USDA Distance Learning, and National Science Foundation awards and commendations. Founded 1994.

Camp Internet introduces new ways to infuse learning technology in your classrooms

by offering un-matched Internet, GPS and GIS Mapping, Digital Video and Broadcasting tools and opportunities that truly do 'Turn Technology into Learning' for 4th-12th grade students. Based on a foundation of professional development for teachers, this unique, proven program delivers classrooms learning activities year round and encourages parent involvement.
