Floating Oceanography
Marine Lab!*

Come learn about the time Zorro 'Walked the Plank' at the hands of pirates threatening California! Fact or fiction ?

Or how the Lone Woman of San Nicolas Island survived alone on a remote island for 18 years ... two of the many great stories and unsolved mysteries that surround the Channel Islands - find out what *really* happened!

Come online each week as a fun afterschool enrichment activity. Learn about the amazing California Channel Islands - eight mysterious islands off the central coast rich in the histories of native Americans, pirates, smugglers, shipwrecks, land battles and more ! Explore under the sea to learn about the creatures that call the Channel waters their home. And learn about the ancient mammoths who swam the channel to reach the islands and over thousands of years shrank smaller and smaller to become dwarf pygmy mammoths. Or learn about the bones found on Santa Rosa Island that are the **OLDEST** human bones found in North America! Fierce pirates, eccentric treasure hunters, peaceful Indians, treacherous sailing lanes - these are the **GREAT** stories, facts, and people you can explore with Camp Internet.
