history, and reading into  
your classroom!

## NEW for 2003

---

# Camp Internet Workshop

for 'Enhancing Education Through  
Technology'

---

**BIA School Teachers and Computer Lab Coordinators** are invited to enroll in a brand new professional development workshop with innovative online and GIS mapping field programming

**Workshop Format** The three-day workshop will convene in Santa Barbara on Sunday evening and begin developing new classroom teaching tools in the computer lab Monday (including advanced Internet Dig and new instant-build GIS mapping projects). Those electing to travel out to Santa Rosa Island will board the boat Monday evening, for an overnight, and then depart for Santa Rosa in the early morning on Tuesday. With five hours on this remarkable Island, steeped in prehistoric events and today home to rare species, Camp Explorers will use GPS units to map and photograph sections of the Island, and draft their field reports on Tuesday. Anyone opting for land-based discoveries will have related local options. On Wednesday, our Explorers will reconvene in the Camp Internet computer lab for a morning of field report development and GIS map data uploads to create Camp Internet's premier map of Santa Rosa Island! In the afternoon, we will develop classroom deployment, new campus-wide, and Family Night project plans for the coming school year, and see presentations of fellow Camp Explorer's field reports.

**May 11<sup>th</sup>-14<sup>th</sup> in Santa Barbara CA**

Sign-up online at  
**[www.campinternet.net](http://www.campinternet.net)**

**Open to teachers enrolled in the year-round classroom program**

(\$295 per class / \$280 if 2 or more). **Fees for the workshop** are \$375 per person; \$360 in groups of 2-9, and includes overnight on boat and trip to Santa Rosa Island, plus two days of lab activities. Land-based option is \$350/\$335. Hotel, food, and travel arranged by participants.
